

10/529014
JC17 Rec'd PCT/PTO 24 MAR 2005

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

1. (Original) A composition with effects of decline prevention, improvement or enhancement of normal responses of cognitive abilities of a healthy person, containing arachidonic acid and/or a compound with arachidonic acid as a constituent fatty acid.

2. (Original) A composition according to claim 1, wherein the compound with arachidonic acid as a constituent fatty acid is an arachidonic acid alcohol ester or a triglyceride, phospholipid or glycolipid containing arachidonic acid as part or all of the constituent fatty acid.

3. (Original) A composition according to claim 2, wherein the triglyceride containing arachidonic acid as part or all of the constituent fatty acid is a triglyceride having medium-chain fatty acids bound at the 1,3-positions and arachidonic acid bound at the 2-position.

4. (Original) A composition according to claim 3, wherein the medium-chain fatty acids are selected from among fatty acids of 6 to 12 carbons.

5. (Original) A composition according to claim 4, wherein the medium-chain fatty acids are selected from among fatty acids of 8 carbons.

6. (Original) A composition with effects of decline prevention, improvement or enhancement of normal responses of cognitive abilities of a healthy person, which contains triglycerides including triglycerides containing arachidonic acid as part or all of the constituent fatty acid.

7. (Original) A composition according to claim 6, characterized in that the arachidonic acid content of the triglycerides including triglycerides containing arachidonic acid as part or all of the constituent fatty acid is at least 10 wt% of the total fatty acid in the triglycerides.

8. (Currently Amended) A composition according to claim 6 or 7, wherein the triglycerides including triglycerides containing arachidonic acid as part or all of the constituent fatty acid are extracted from microbes belonging to the genus *Mortierella*.

9. (Currently Amended) A composition according to ~~any one of claims~~ claim 6 to 8, wherein the triglycerides including triglycerides containing arachidonic acid as part or all of the constituent fatty acid are triglycerides containing no eicosapentaenoic acid or containing no more than 1% eicosapentaenoic acid.

10. (Original) A composition with effects of decline prevention, improvement or enhancement of normal responses of cognitive abilities of a healthy person, which contains triglycerides including at least 5 mole percent of triglycerides with medium-chain fatty acids bound at the 1,3-positions and arachidonic acid bound at the 2-position.

11. (Original) A composition according to claim 10, wherein the medium-chain fatty acids are selected from among fatty acids of 6 to 12 carbons.

12. (Original) A composition according to claim 11, wherein the medium-chain fatty acids are selected from among fatty acids of 8 carbons.

13. (Currently Amended) A composition according to ~~any one of claims~~ claim 1 to 12 with effects of decline prevention, improvement or enhancement of the normal responses of a healthy person of processing speed or response speed with respect to events selected from the group consisting of auditory stimuli, visual stimuli, olfactory stimuli, gustatory stimuli and somatosensory stimuli, as a cognitive ability.

14. (Currently Amended) A composition according to ~~any one of claims~~ claim 1 to 12 with effects of decline prevention, improvement or enhancement of the normal response of concentration of a healthy person with respect to events selected from the group consisting of auditory stimuli, visual stimuli, olfactory stimuli, gustatory stimuli and somatosensory stimuli, as a cognitive ability.

15. (Currently Amended) A composition according to ~~any one of claims~~ claim 1 to 12 with effects of decline prevention, improvement or enhancement of the normal response of awareness level of a healthy person, as a cognitive ability.

16. (Currently Amended) A composition according to ~~any one of claims~~ claim 1 to 12 with effects of decline prevention, improvement or enhancement of the normal response of discriminatory ability of a healthy person with respect to events selected from the group consisting of auditory stimuli, visual stimuli, olfactory stimuli, gustatory stimuli and somatosensory stimuli, as a cognitive ability.

17. (Currently Amended) A composition according to ~~any one of claims~~ claim 1 to 12 with an effect of shortening P300 latency of the event related potentials of brain (P300), as a response index of cognitive ability.

18. (Currently Amended) A composition according to ~~any one of claims~~ claim 1 to 12 with an effect of augmenting the P300 amplitude of the event related potentials of brain (P300), as a response index of cognitive ability.

19. (Currently Amended) A composition according to ~~any one of claims~~ claim 1 to 18, wherein the composition is a food composition or pharmaceutical composition.

20. (Original) A food composition containing arachidonic acid and/or a compound with arachidonic acid as a constituent fatty acid, in an amount such that the daily ingestion for an adult is 0.001-20 g in terms of arachidonic acid.

21. (Original) A food composition according to claim 20, wherein the compound with arachidonic acid as a constituent fatty acid is an arachidonic acid alcohol ester or a triglyceride, phospholipid or glycolipid comprising arachidonic acid as part or all of the constituent fatty acid.

22. (Original) A food composition according to claim 21, wherein the triglyceride containing arachidonic acid as part or all of the constituent fatty acid is a triglyceride having medium-chain fatty acids bound at the 1,3-positions and arachidonic acid bound at the 2-position.

23. (Original) A food composition according to claim 22, wherein the medium-chain fatty acids are selected from among fatty acids of 6 to 12 carbons.

24. (Original) A food composition according to claim 23, wherein the medium-chain fatty acids are selected from among fatty acids of 8 carbons.

25. (Original) A food composition characterized in that the composition contains at least 0.001 wt% of triglycerides having medium-chain fatty acids bound at the 1,3-positions and arachidonic acid bound at the 2-position.

26. (Original) A food composition according to claim 25, wherein the medium-chain fatty acids are selected from among fatty acids of 6 to 12 carbons.

27. (Original) A food composition according to claim 26, wherein the medium-chain fatty acids are selected from among fatty acids of 8 carbons.

28. (Currently Amended) A composition according to ~~any one of claims~~ claim 20 ~~to 27~~, wherein the food composition is a functional food, nutritional supplement food, special health care food or geriatric food.

29. (Currently Amended) A composition according to ~~any one of claims~~ claim 1 ~~to 28~~, which further comprises docosahexaenoic acid and/or a compound with docosahexaenoic acid as a constituent fatty acid.

30. (Original) A composition according to claim 29, wherein the compound with docosahexaenoic acid as a constituent fatty acid is a docosahexaenoic acid alcohol ester or a triglyceride, phospholipid or glycolipid comprising docosahexaenoic acid as part or all of the constituent fatty acid.

31. (Currently Amended) A composition according to claim 29 ~~or 30~~, ~~characterized in that~~ wherein the arachidonic acid/docosahexaenoic acid ratio (by weight) in a combination of the arachidonic acid and docosahexaenoic acid is in the range of 0.1-15.

32. (Currently Amended) A composition according to ~~any one of claims~~
~~claim 1 to 34~~, characterized in that wherein eicosapentaenoic acid is also present in
the composition in an amount not exceeding 1/5 of the arachidonic acid in the
composition.

33. (Currently Amended) A process for production of a food composition
with effects of decline prevention, improvement or enhancement of normal
responses of cognitive abilities of a healthy person, ~~characterized by~~ comprising
combining arachidonic acid and/or a compound with arachidonic acid as a
constituent fatty acid, either alone or with a food material containing either essentially
no or only a trace amount of arachidonic acid.

34. (Currently Amended) A method for marketing a composition with effects
of decline prevention, improvement or enhancement of normal responses of
cognitive abilities of a healthy person containing arachidonic acid and/or a compound
with arachidonic acid as a constituent fatty acid, the method for marketing a
composition with effects of decline prevention, improvement or enhancement of
normal responses of cognitive abilities of a healthy person ~~being characterized by~~
comprising using a packaging container and/or merchandising tool which indicates
that the composition and/or components in the composition have effects of decline
prevention, improvement or enhancement of normal responses of cognitive abilities
of a healthy person.

35. (Currently Amended) A composition with effects of decline prevention, improvement or enhancement of normal responses of cognitive abilities of a healthy person, ~~characterized by being a~~ comprising composition containing arachidonic acid and/or a compound with arachidonic acid as a constituent fatty acid which is marketed using a packaging container and/or merchandising tool for the composition indicating that the composition and/or components in the composition have effects of decline prevention, improvement or enhancement of normal responses of cognitive abilities of a healthy person.
